Pet and Feed Industry

Let Us Help You Make the Right Decision and Do it Right The First Time

Cloud computing has opened up new options in the Point-of-Sale realm. While it has many benefits, it also has a few downsides. There is also the question of which cloud platform to go with? Access and security of your data is critically important. It would be a catastrophe if its lost it or if your completion or others got access to it. We believe in a eyes wide open approach so you can make the right choice. Be sure to ask the other companies these questions. They tend to leave out many facts when doing their sales pitch.

	<u>Darts In-House</u>	<u>Darts Cloud</u>	<u>Other Cloud</u>
1. Is the cloud server in a Tier IV Gold facility? This indicates 100% uptime ability due to multiple levels of redundancy including: power, internet, server blades, drives, etc. Only 5 centers internationally have this status.	n/a	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. Is there hardware firewall data protection? Hardware firewalls protect others from accessing your data by verifying the IP address of the system doing the access. All non-authorized computers are blocked.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
3. Is automatic fallback for the internet available? Automatic fallback switches from your internet provider to an alternate source such as cellular should your internet go down. This would happen seamlessly so you would have no interruptions in your operation.	n/a	<input checked="" type="checkbox"/>	<input type="checkbox"/>
4. Is there a way to access your data to excel? Many cloud systems will only allow limited access to your data. This means if you decide to switch to a different system you literally lose all your information including your customer list, sales history, customer receipts, purchase orders, etc.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
5. Once the system is paid are ongoing fees optional?	<input checked="" type="checkbox"/>	no	no
6. Does the system offer RF wireless units? Our RF wireless units allow you to: Receive orders, print shelf labels, pre-ring customer purchases at the checkout during busy periods. In addition instantaneously change sell prices and do physical inventories on the fly while you are open for business.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
7. Can multiple vendor catalogs be loaded ? Loading multiple vendor catalogs allows you to: Automatically shop for the best price between vendors while manually or automatically Creating your purchase orders. Also access and sell items in your vendor catalogs that you don't usually carry in stock	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
8. Does the company offer a seamless way to convert from the cloud to their in-house system at no charge?	n/a	<input checked="" type="checkbox"/>	<input type="checkbox"/>
9. Is the system customizable to meet the unique needs of your operation?	<input checked="" type="checkbox"/>	limited	<input type="checkbox"/>
